

Customer and Payment Data Insights Report

1. Key Insights from Customers Table

1. Total Orders and Sales

Query - SELECT
order_status,
COUNT(order_id) AS total_orders,
FLOOR(SUM(order_amount)) AS total_sales
FROM customer_orders
GROUP BY order_status
ORDER BY total_sales DESC;

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with three columns: 'order_status', 'total_orders', and 'total_sales'. The data is sorted by 'total_sales' in descending order. The 'total_sales' values are displayed in scientific notation.

	order_status	total_orders	total_sales
▶	delivered	2242	571867.6400000014
	pending	2152	544000.3800000014
	shipped	2027	526495.8099999997

- **Insight:** This metric shows the overall total revenue generated. It provides a top-level view of how the business is performing in terms of order intake and revenue.

- The highest number of sales 571867

2. Completed Orders Count

QUERY - SELECT COUNT(*) AS completed_orders
FROM customer_orders
WHERE order_status = 'delivered' ;

The screenshot shows a database interface with a 'Result Grid' tab. It contains a table with two columns: 'completed_orders' and a value. The value is 2242.

	completed_orders
▶	2242

- **Insight:** Tracks the number of successfully fulfilled orders is 2242 . A high number indicates good fulfillment performance,

3. Monthly Order Trends

Query - SELECT
EXTRACT(YEAR FROM order_date) AS year,
COUNT(order_id) AS total_orders,
SUM(order_amount) AS total_sales
FROM customer_orders
WHERE order_status = 'delivered'

```
GROUP BY EXTRACT(YEAR FROM order_date)
ORDER BY year
limit 1;
```

Insight: Year 2020 has highest no of sales 104775.02

- This helps identify seasonality, promotional impact, or sales slumps. Monthly patterns can also help with stock planning and campaign timing.

5. One-Time Buyers (Churn Risk)

Query - SELECT
customer_id,
COUNT(order_id) AS total_orders,
CASE
WHEN COUNT(order_id) > 1 THEN 'Repeat
Customer'
ELSE 'One-Time Customer'
END AS customer_type
FROM customer_orders
WHERE order_status = 'delivered'
GROUP BY customer_id;

Result Grid			
Filter Rows:			
	customer_id	total_orders	customer_type
	1009	1	One-Time Customer
	1029	1	One-Time Customer
	1046	1	One-Time Customer
	1050	3	Repeat Customer
	1066	1	One-Time Customer
	1068	1	One-Time Customer
	1083	1	One-Time Customer

- **Insight:** Identifies customers who have made only one purchase and repeat Customers.
 - The customer_id 1050 has 3 times repeat customers of Alt-Mobility
 - These are potential churn risks, and can be targeted for re-engagement campaigns.

2. Key Insights from Payments Table

1. Total Payments by Status

Query- SELECT
payment_status,
COUNT(order_id) AS total_payments
FROM Payments
GROUP BY payment_status
ORDER BY total_payments ASC;

Result Grid		
Filter Rows:		
	payment_status	total_payments
▶	completed	4991
	failed	5003
	pending	5006

- **Insight:** Indicates the status of the payment system .

The Completed Payments is 4991 and needs a lot of improvements by reducing number of pending payment status

2 Failed Payment data in year

Query - SELECT

EXTRACT(YEAR FROM payment_date) AS year,

EXTRACT(MONTH FROM payment_date) AS month,

COUNT(order_id) AS failed_payments

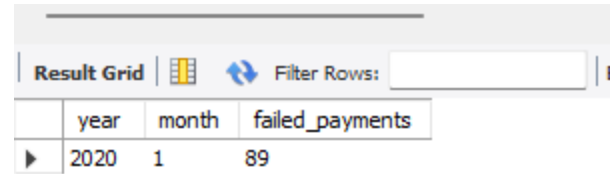

FROM Payments

WHERE payment_status = 'Failed'

GROUP BY EXTRACT(YEAR FROM payment_date), EXTRACT(MONTH FROM payment_date)

ORDER BY year, month

limit 1;

The screenshot shows a 'Result Grid' interface with a 'Filter Rows' input field. Below the header, a table displays the results of the query for the year 2020 and month 1.

	year	month	failed_payments
▶	2020	1	89

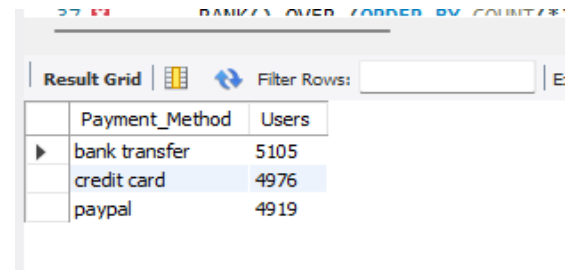

3. Top Payment Methods

Query - SELECT Payment_Method, COUNT(*) AS Users

FROM Payments

GROUP BY Payment_Method

ORDER BY Users DESC;

The screenshot shows a 'Result Grid' interface with a 'Filter Rows' input field. Below the header, a table displays the top payment methods ranked by the number of users.

	Payment_Method	Users
▶	bank transfer	5105
	credit card	4976
	paypal	4919

- Insight: high number of users 5105, have made Payments Through Banks Itself.

- It shows which payment methods customers prefer can help improve User Experience and reduce cart abandonment by offering more relevant options related to Payment gateways.
